

GPA CALCULATION WORKSHEET*

Each letter grade you receive has a numerical equivalent called Quality Points.

Letter Grade	A	B+	B	C+	C	D+	D	F	UW	WU	S	U	UU	INC	NA
Quality Points	4	3.5	3	2.5	2	1.5	1	0	0	-	-	-	-	-	-

The total quality points you have earned, divided by the total credits you have attempted, determines your GPA.

Example:

Course	Grade	Quality Points	Credits	Credits x Quality Points
BIO 101	B+	3.5	4	14
ENG 101	A	4	3	12
MAT 100	C+	2.5	4	10
RDG 002	S	-	-	-
PED 657	F	0	1	0
			12 (Total Credits)	36 (Total Quality Points)

$$\text{(Total Quality Points)} \div \text{(Total Credits)} = \text{GPA}$$

For this example: $\boxed{36} \div \boxed{12} = \boxed{3.0}$

IMPORTANT NOTES:

The credits for a course in which you received an F or a UW must be included in your credit totals, even though they result in no quality points.

Grades of W, WU, S, U, UU, INC and NA carry no quality points and, therefore, have no affect on your GPA. However, an INC grade will convert to an F if the outstanding coursework is not completed by the end of the following fall or spring semester.

If you have repeated any courses, you must use the **most recent** grade earned when calculating your overall GPA, but should only count the credits for the course once.

Fill out the chart below in order to calculate your own GPA:

Course	Grade	Quality Points	Credits	Credits x Quality Points
			(Total Credits)	(Total Quality Points)

$$\begin{array}{ccc}
 \boxed{} & \div & \boxed{} = \boxed{} \\
 \text{(Total Quality Points)} & & \text{(Total Credits)} \quad \text{Your GPA}
 \end{array}$$
